

Giorgi shalamberidze

Software Engineer

I am a Software Engineer with over **9 years of experience**, primarily focused on **Front-End development** using JavaScript and modern web technologies. Throughout my career, I have worked on a wide range of projects, building **clean, maintainable, and high-performance applications** with a strong focus on scalability and code quality.

I have extensive experience with JavaScript frameworks, industry standards, and best practices, as well as writing **well-structured, tested code** using tools such as **Jest**. I value clean architecture, clear data structures, and long-term maintainability in every project I work on.

In addition to hands-on development, I have worked as a **Lead Developer**, mentoring team members and contributing to technical decision-making.

I am continuously learning and expanding my skill set, particularly in **Back-End development**, and I enjoy exploring deeper engineering concepts to grow as a well-rounded software professional.

October 2019 - August 2020

I have been working on big e-commerce projects and also building mockups for marketing teams.

- Working with React.js / Redux
- Was working on one big e-commerce project
- Start using static website generators (Gatsby, Next.js)
- Self-task management
- Start using CI/CD on GitHub

Front-End developer, Circle., Tbilisi, On-site

November 2018 - October 2019

Circle was so interesting, because we had different types of websites and applications: Real Estates, Hotels, Medical Care, Ministry, etc. Each of them had different and interesting challenges and gave me good solving experience.

- Build fully responsive and exact markups
- Used Plain javascript and JQuery
- Used React.js / Redux
- Worked with React Native
- Worked with Scrum
- CSS animations
- Worked with difficult structured websites

Frontend Developer, Realtyna, Georgia, On-site

February 2018 - September 2018

Realtyna was a good opportunity to work with foreign people. They gave me good communication skills.

- Worked on WordPress
- Supported WordPress real-estate plugin
- Built WordPress plugin with React.js
- Communication with clients and make customizations for them
- Started to make solution of development processes

Frontend Developer, ITDC, Georgia. On-site

July 2017 - January 2018

At ITDC, I supported and created interesting and popular websites. I was working with an experienced team, and they gave me good knowledge of React.js and started using new standards.

- Work on React.js / Redux Big projects working experience
- Learned how to write clean code
- Props type checking
- Api integrations.

Frontend Developer, Wandio, Tbilisi Paliashvili str #88 On-site

December 2016 - May 2017

Wandio gave me good teamwork experience, working with project managers, working with Scrum and daily meetings, project planning and many interesting things.

- Build Markups
- Write plain Javascript
- Start using React.js / Redux to work on foreign projects
- Learned about Scrum
